The health, safety and well-being of students and staff is a top priority as schools are reopening. It's important that everyone in our school communities take steps to reduce COVID transmission, particularly to those at high risk, while balancing the need to maintain a strong education system that effectively supports staff, students, and communities. Practicing enhanced cleaning and disinfection routines of frequently touched surfaces such as tables, doorknobs, light switches, and handrails is a key strategy to help keep everyone safe.

Cleaning breaks down grease and removes organic material from surfaces and is done separately before using disinfectants. Cleaning will remove dirt and some germs but not kill viruses.

Disinfecting aims to kill most germs and viruses, depending on the type of chemical use
